## Oki Doki Hostel

Oki Doki Warsaw Hostel is a place created especially for all the individualists out there as an alternative to the mainstream accommodations.

That is the reason **it was ranked as one of the 10 best Hostels in the World for all 2006** according to the Hostelworld backpackers. They gave their votes for nearly 15000 hostels in the world.

Inexpensive, **located in the very city centre**, on the main street, just 10 minutes walk from the Old Town and with extraordinary interior design, each room being a separate artistic project.

This is the **first Art Hostel opened in Warsaw**. In the age of supermarkets and conformity they decided to create something cosy and personal. We aim to please the individualistic, and all those who like being treated that way - personally and individually. Each room is designed in a different style and by a different artist. Instead of being numbered, each room has its own name. People who work here are young, in love with Warsaw. They know its history and its places worth seeing. They love to party and frequent its clubs and art galleries.

### **Address:**
